**REASONS FOR ALLOWANCE**

---

The following is an examiner's statement of reasons for allowance:

- Claims 1-21 are allowed over prior art of record that neither teaches nor fairly suggestive of a metal complex composition, a method of preparing the complex solution and a process of preparing a superconductor meeting the limitations of the instant claims by the applicants.

The closest prior art by Mizuta et al (US Patent 5,039,654) discloses making of YBCO123 starting from acetylacetonates of the components in a solvent of pyridine and propionic acid (Col-6, Example-9). Gupta et al (Appl. Phys. Lett. 1988 52(24) 2077-2079) and Araki et al (JP 2002-080297) teach making of YBCO123 from aqueous solutions of trifluoroacetates obtained from aqueous solutions of mixed metal acetates. Prior art of record neither teaches nor suggestive of a metal complex consisting of acetylacetonate-trifluoroacetate-pyridine and a method of making the complex and a process of making a superconductor meeting the limitations of the instant claims by the applicants.

- The examiner construes the phrase "sufficient" in claim-16 to be definite as period of heating is limited to the formation of superconductive phase known to one of ordinary skill in the art.
- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kallambella Vijayakumar whose telephone number is 571-272-1324.

The examiner can normally be reached on M-Th, 07.00 - 16.30 hrs, Alt. Fri: 07.00-15.30 hrs.
